

## Drought Outlook: 2013

**Date:** Tuesday January 22, 2013

**Time:** 12:00 Eastern/11:00 Central/10:00 Mountain/9:00 Pacific

**N**atural disasters and drought conditions have caused widespread effects across the farm economy in 2012 by increasing price volatility and production risk, as well as increasing financial uncertainty. The third of our three-part webinar series presents an outlook for 2013, including: climate, crop and livestock policy changes related to drought and disaster impacts. Presentations and presenters include:

### **Livestock and grazing policy outlook and implications for 2013 -**

David Anderson (Texas A&M University)

### **Crop weather and climate cycles: the outlook for 2013 and beyond-**

Elwynn Taylor (Iowa State University)

### **Crop policy outlook with respect to insurance and disaster programs for 2013 -**

Vince Smith (Montana State University)

This webinar will address strategies for the upcoming production year as we face uncertain institutional, production and market risks. All three drought and natural disaster webinars are co-hosted by the AAEA Extension Section.
